Java Full Stack Developer | Spring Boot & React.js | BBA(CA) Graduate

Professional Summary

- ✔ Motivated Java Full Stack Developer specializing in building scalable web applications using Spring Boot, React.js, and RESTful architectures.
- ✔ Hands-on software development exposure gained through a structured 6-month Industrial Training program and Internship at Kiran Academy.
- ✔ Strong understanding of Database Design & Backend API Integrations, including user authentication and secure JWT validation.
- ✔ Collaborative team player familiar with Agile frameworks, standard code versioning workflows, and software development testing.
- ✔ Proficient in building clean CRUD operations and managing database mappings using JPA/Hibernate.

Technical Skills

- Programming & Scripting: Java, Core Java, JavaScript, SQL, HTML5, CSS
- Frameworks & Libraries: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, React.js, Bootstrap
- Databases & Security: MySQL, JDBC, JWT (JSON Web Tokens), Spring Security
- Tools & IDEs: Git, GitHub, Maven, Postman, Eclipse, VS Code, REST APIs

Industrial Training & Internship

Kiran Academy | Trainee Developer (Intern)  Nov 2025 – May 2026

 Domain: Enterprise Application Development

 Core Focus: Java Full Stack Technologies

 Key Responsibilities:

- ✔ Contributed directly to a live technical project to gain hands-on production application experience.
- ✔ Developed code modules, performed functional validation, and handled form logic on a live codebase.
- ✔ Translated application workflow specifications into robust, testable full-stack Java components.
- ✔ Managed version history with Git and verified API response behaviors using development testing patterns.

Technical Projects

◆ Project 1: Personal Library Management System

-  Technologies: Java, Spring Boot, React.js, MySQL, JWT, Spring Security, JPA/Hibernate
-  Core Outcome: Built a secure full-stack web application designed for centralized, single-user digital book collection management.
-  Key Responsibilities:
 -  Designed database mapping tables with `@Entity` annotations to establish clean data relationships.
 -  Customized token authentication with Spring Security to safeguard user access.
 -  Engineered REST API endpoints enabling seamless CRUD workflows, tying backend services directly to an async React interface.

◆ Project 2: Student Management System

-  Technologies: Java, Spring Boot, React.js, MySQL, Jakarta Persistence (JPA), Hibernate
-  Core Outcome: Developed an administrative software system to manage student profile identification and multi-subject academic records.
-  Key Responsibilities:
 -  Implemented clean database separation principles using `@Embeddable` entity mapping blocks.
 -  Built controller architectures to automatically process and track calculations and core evaluation metrics.

Certifications

-  Certificate of Completion – Java Full Stack Course | Kiran Academy (2026)
-  Internship Completion Certificate – Kiran Academy (Serial No: JBK-INT-COMP-202605-000240)

Education

 Bachelor of Business Administration (Computer Applications) - BBA(CA)
Savitribai Phule Pune University | Pune, Maharashtra (Graduation: 2025)

Personal Information

-  Date of Birth: 20th September 2004
-  Marital Status: Single
-  Languages Known: English, Hindi, Marathi
